FUJITSU Notebook LIFEBOOK U7 Series

Ultra-Mobile meets Ultra Secure

The FUJITSU Notebook LIFEBOOK U7 Series is the slim, light and stylish ultra-mobile notebook family for business professionals based on the 11th generation Intel® Core™ processor. Three models meet all modern workplace challenges with various display sizes and ample battery life for long working days.

Stylish ultra-mobile notebook that supports ergonomics in the office

Provide an excellent user experience with the FUJITSU Notebook LIFEBOOK U7 Series to different user profiles and – at the same time – meet your corporate demands. Make your desk sharing concepts a reality with the LIFEBOOK U7 Series port replicators. And support modern work styles with features like the following:

- Elegant design made with magnesium warm silver housing
- Premium connectivity
- Outstanding data security
- Effective privacy protection
- Excellent mobility and portability
- 13.3-, 14.0- and 15.6-inch screens

The ePrivacy filter digitally blocks digital snoops

At the press of a single key, the notebook goes into stealth mode – digitally blocking the screen from being readable from an indirect viewing angle.

Premium connectivity

Stay flexible in any environment with a full set of interfaces supporting Intel® Thunderbolt™ 4 and Global 5G. Work comfortably with full-size ports, including the LAN port, eliminating the need for extra adapters that might get lost and result in additional costs. And if you ever leave your device, MS Modern Standby ensures that it is instantly ready for use when you want to start working again.

Outstanding security

Do not compromise on security and privacy. Save yourself the hassle of entering passwords. Instead, log in conveniently with your palm vein pattern (PalmSecure™), fingerprint or face recognition with Windows Hello (with IR camera). Furthermore, the privacy camera shutter protects your privacy. And the ePrivacy Filter protects you from prying eyes – for example, on a plane or train.

Ultimate convenience

Make your workday easier with an ultra-mobile notebook in an elegant warm-silver magnesium housing and very slim bezel, that can weigh as little as 1.17 kg, has a glare-free HD or FHD display and FHD touch panel option, and is highly durable (tested in accordance with Military Standard MIL-STD-810H).

Made for productive workdays

Work with a full day battery life, multitask faster thanks to Intel® vPro™ platform, dock conveniently at your desk with the new longlife family port replicator, and free your desk from cable clutter.
